Re: Airband roll-out to Brentor

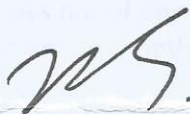

Dear Mrs Oxenham,

As the Parish Council are no doubt aware, there has been some confusion over the roll out of Airband to Brentor. It has come to our attention that Brentor residents, telephoning Airband to enquire as to progress, have been told that the Brentor PCC is responsible for the delays and is refusing to cooperate.

This is factually untrue – we are entirely supportive of the programme and have offered our support and our buildings to the company for their equipment; we have however received no response from them. It is unfortunate that St Michael's is not suitable – it is a Grade I listed building with no electrical or other services and our architect informs us that the modifications required to the site are not viable – but we have offered Christchurch in the village.

Please find attached our letter to Airband, for the information and records of the Parish Council.

Yours sincerely,

Dr David Harris MRCVS
Churchwarden
