

Working with your community

Your community might have several different areas suitable for a Community Helipad and we will initially undertake an assessment of potential sites before advising on which location, and lighting array, would make the most suitable helipad. We will then work closely with your community to develop its own Community Helipad.

If you would like to find about more about developing a Community Helipad please contact the Community Helipad Development Officer, Toby Russell, on 01392 466666 or email t.russell@daat.org

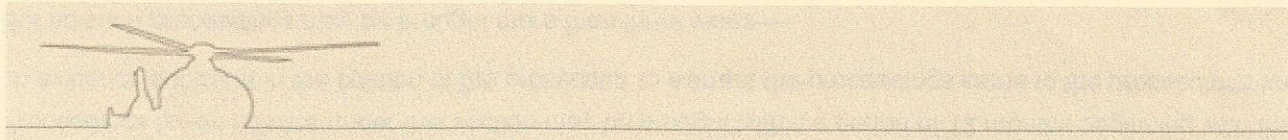

**From all at
Devon Air Ambulance Trust
we wish you a
Merry Christmas
and a Happy New Year!**
