Dear Parish Councillors,

We have now received permission from Defra to publicise the Greater Dartmoor LEAF funding programme. Active promotion has been on hold since the EU referendum at the request of Defra and the Treasury, due to uncertainties over whether the funding would continue. South Hams is the accountable body for these programmes and the associated administration is largely conducted by the DR Company.

The letter attached to this email explains more about the funding available to local businesses through the LEAF and how this funding can support our local economy. The attached traffic light report shows the projects which have been approved to date (by ward). Any business within all parishes / wards in West Devon can apply, subject to meeting the programme criteria.

Please do promote this funding programme to your network, so that this European funding can be put to good use in West Devon.

Do contact myself or DR Company direct with any queries.

Kind regards

Darren
