27th October 2017

Dear Brentor Parish Council,

We are writing to you to firstly reiterate our sincere apologies for the time it has taken to connect a large proportion of Brentor Parish from the Church transmitter.

As you may be aware, the project across Dartmoor has presented various difficulties, and the transmitter located on top of Christ Church, Brentor, is not excluded, offering its own unique challenges to overcome.

As a means of ensuring that this process does not continue further without connecting those who have been waiting a long time for connectivity, Airband has implemented a temporary solution that is now live and feeding the Church transmitter. This is an interim solution whilst permission is secured for the permanent site to be implemented. We hope that following the consultation period, the permanent solution can be in place by February 2018.

All existing orders awaiting installation in the area will have 6 months half price service automatically applied to their account, and any new orders can enter BRENTOR17 in the promotional code box on the order form to receive the same offer.

Thank you for your extended patience and understanding, and please do get in touch if you have any further questions or queries.

Yours sincerely,

Redmond Peel
